Re: City of West Allis Bicycle and Pedestrian Plan Proposal

Dear Mr. Stibal,

The Bicycle Federation of Wisconsin is pleased to submit a proposal for the City of West Allis's Bicycle and Pedestrian Master Plan.

The Bicycle Federation of Wisconsin is uniquely qualified to create an excellent Bicycle and Pedestrian Plan for the City of West Allis. The Bicycle Federation of WI (BFW) has extensive expertise in bicycle and pedestrian planning in Wisconsin. The BFW is currently completing bicycle plans for 3 communities in Wisconsin and has been awarded the contract to update the City of Milwaukee's Bicycle Master Plan. The BFW has completed multi-use trail infrastructure studies and bicycle plans including:

- Milwaukee On-Street Bikeway Feasibility Study
- Milwaukee Off-Street Bikeway Feasibility Study
- Village of Mount Pleasant Bicycle Master Plan

The BFW team will consist of Jack Hirt, Project Manager, with support from Jessica Wineberg and Greg Rybarczyk. With this team, the BFW brings bicycle user and facilities knowledge, expertise in bikeway and pedestrian planning and design, local access and knowledge, Geographic Information System expertise, hands-on experience with education and encouragement programs, and the ability to develop creative and innovative solutions to implement projects.

We look forward to the opportunity to work with you in completing this project and thank you for reviewing the BFW Proposal for the City of West Allis Bicycle and Pedestrian Plan. Please contact me with any further questions you may have.

Respectfully submitted,

Jack E. Hirt, Executive Director

Over the past several years, Milwaukee County communities have achieved substantial gains in the area of bicycle and pedestrian transportation. Bicycle and pedestrian planning is a key component of this success. These communities, such as West Allis, recognize that pathways, on-street bikeways, sidewalks, and parks and green space are critical components of a livable urban community. For West Allis a complete bikeway and walkway system can offer numerous benefits from air and water quality improvements, reduced dependency on automobiles, stronger community and neighborhood identity, recreation opportunities, and improved public health. A comprehensive system of on-street and off-street bikeways connected to key destinations will also serve pedestrians and help harness redevelopment and outside funding opportunities for the City of West Allis. Further, key state multiuse trail projects that run through West Allis are already being planned (such as the Hank Aaron State Trail Extension and the West Allis Cross Town Connector). The West Allis Bicycle and Pedestrian Master Plan can serve to guide these existing projects to ensure that they are designed to meet the local needs of the city as well as develop future projects and programs. Though short and long-term infrastructure and policy solutions, a Bicycle and Pedestrian Master Plan will help West Allis's decision makers achieve desired bicycle and pedestrian mode share goals.

To create an effective Bicycle and Pedestrian Master Plan for the City of West Allis the Bicycle Federation of WI (BFW) proposes to:

- **Inventory and Evaluate** the existing Bikeway Network – both on and off street
- **Inventory and Evaluate** the existing sidewalk and crosswalk ordinances and design standards
- **Enhance and Expand the City's Bikeway and Pedestrian Network**
- Recommend **"State-of-the-Art" Bicycle and Pedestrian Facilities** suited for West Allis
- Recommend **Bicycle Parking** and other end-of-trip facilities such as change facilities, lockers and showers
- **Improve Connectivity**, including pedestrian and bicycle access to transit, future trail corridors and key destinations
- Work to **Integrate any New Bikeways** into the update of the Milwaukee by Bike Map
- Recommend **Education and Outreach** strategies to reach pedestrians, cyclists and motorists
- Provide **Design Standards** that meet all national and

- local laws
- Recommend **Health and Wellness** marketing strategies
- **Enhance Safety** through infrastructure and law enforcement countermeasures
- **Analyze Spending**, both current and recommend levels for pedestrian and bicycle facilities, programs and maintenance
- Recommend **Funding Sources**
- Serve the needs of all West Allis's **Diverse Neighborhoods**

The Bicycle Federation of Wisconsin combines local knowledge with extensive planning expertise. The BFW is a statewide membership-based nonprofit bicycle education and advocacy organization that also does bicycle planning and mapping consulting. Our mission, to Make Wisconsin a Better Place to Bicycle, embraces the basic vision behind the organization; that bicycling is a viable, healthy and environmentally sustainable means of transportation, recreation and sport. We promote bicycling as an integral part of a balanced transportation system, a healthy and fun lifestyle, and a prosperous economy.

The Bicycle Federation has been making Southeast Wisconsin a better place to walk and bicycle for almost a decade through successful and diverse efforts. Projects from the Milwaukee office range from Education (Safe Routes to School education and planning work which supports both walking and biking) and Encouragement (Bike To Work Week, Bike-In Movie Series, Bike Racks on Buses Campaign) to Enforcement (coordinated with Milwaukee Police Department on school zone law enforcement) and Engineering/Facilities (Off-Street Bikeways Study, Milwaukee By Bike Map). The BFW is currently working on 3 Bicycle Plans for communities across the state and has completed many bicycle planning projects for the City of Milwaukee including the Bike Lane Design Guide, The Off-Street Bikeways Study, and the Bicycle Parking Plan. In addition BFW was recently awarded the contract to update the City of Milwaukee Bicycle Master Plan.

Project Approach

Our approach will build upon any previous bicycle planning efforts undertaken by the City of West Allis and bring them up to date and augment them with national best practices, resulting in a high-quality product focused on implementation.

Prior to undertaking any project, we gain a thorough understanding of the project's context and issues, as well as the client's goals and objectives. We assign a project team with the strongest relevant project experience to complete the project at hand. We will develop a detailed work plan for the client's approval that includes all tasks to be completed, deliverables, project schedule, and project budget. The BFW team's approach to the project includes the following proposed tasks:

Task 1: Comprehensive Public Outreach Strategy (70 hours)

The BFW Team will work with staff to form a Bicycle and Pedestrian Plan Steering Committee, conduct a series of public meetings for this project, and ensure that participants reflect the diversity of West Allis's population and many neighborhoods. At a minimum, the Steering

Committee should consist of representatives from the West Allis Public Works Department, Parks and Recreation, Police and Fire Departments, members of the bicycling public, neighborhood representatives and local school districts. Public members of the committee such as those from the bicycle community and schools will be solicited through BFW's local network and via public and school events. BFW will meet with the Steering Committee as needed to review progress and receive input on the draft and final report. Our strategy also integrates an online and print survey as well as Citywide and local neighborhood public workshops.

Task 2: Existing Conditions (50 hours)

Building on the previous planning efforts, BFW will review all previous pedestrian and bicycle planning documents as well as other relevant plans and policies. Combined with field surveys of the City, BFW will capture a snapshot of existing facilities, policies and planning. To ensure the project can be completed efficiently, the BFW team will rely on our staff's intimate familiarity with the City to update and evaluate the existing inventory of bikeway facilities. We will collect all GIS based information available from the City. We understand a key product of the background data collection is to identify bicycle deficiencies based upon existing and planned roadway conditions, including assessing opportunities for crossing major barriers. Reviewing local roadway standards and future roadway plans, combined with fieldwork, will be an extensive component of this phase of the master planning effort.

Task 3: Needs Analysis (70 hours)

Drawing on innovative national best practices, the BFW will gather and analyze data on existing bicycle usage and collisions as well as providing estimates and a benefit analysis of future usage and improvements. The BFW will determine key pedestrian and bicycle destinations and routes and make recommendations for improvements in these areas ensure that the proposed system meets the needs of all ages and abilities from every community and in every neighborhood. The pedestrian analysis will focus on commercial districts, school zones, and policy recommendations. The BFW will also integrate the results of the Safe Routes to School audits into the Bicycle and Pedestrian Plan.

Task 4: Develop Design Guidelines (40 hours)

Based on existing design guidelines at the City and State level, BFW will draw on national and international best practices to recommend changes and improvements to local design guidelines of pedestrian and bicycle facilities. BFW staff members have experience with state of the art bicycle facilities in Milwaukee and throughout the country.

Task 5: Recommendations (60 hours)

Drawing on the Existing Conditions data collection and guided by the Needs Analysis and Design Guidelines efforts, BFW will recommend pedestrian and bicycle facilities (on-street, off-street, signage and parking) and other roadway improvements, as well as programs (education, encouragement and enforcement) and policies. These recommendations will be presented in written and map form. Along with recommendations for specific programs,

BFW has unique experience in program implementation in the State of Wisconsin and has the ability to tailor them to the specific demographics of West Allis.

Task 6: Implementation Plan (60 hours)

This critical plan element will evaluate current spending and maintenance as well as make recommendations for future spending in the form of detailed cost estimates. To be as accurate as possible, cost estimates will be based on recently completed projects in the area to accurately reflect local labor and construction costs. Included in this task will be a summarized review of all possible federal and state funding sources with contacts.

Task 7: Deliver Draft and Final Report Documents (90 hours)

BFW will deliver high-quality draft and final reports using illustrative graphics and effective GIS-based mapping to communicate the vision for West Allis's bicycle and pedestrian network. Quality control staff will ensure the highest standards for report text and formatting. The final report will include the following:
