**Subject:** TiPPS Sole Source Acquisition

I am requesting that the new TiPSS Court software be purchased as a sole source acquisition.

The TiPSS (Titan Public Safety Solution) is located in Lake Mills, WI and is designed specifically for Wisconsin. A successful court software package must contain all the necessary interfaces to the State of Wisconsin Department of Transportation for license suspensions, WI TraCs for electronic citations, WI Department of Revenue for the Tax Intercept Programs, Electronic State Reporting System, and others. Other out of state products are either very limited or do not have these existing interfaces in place because they were not specifically designed for the State of Wisconsin. We are very inefficient and unproductive without these interfaces between the City of West Allis Municipal Court System and the State of Wisconsin.

The TiPSS Court package is in use by over 70 municipal courts in Wisconsin and is easily the most widely used in the area. This allows are court clerks access to peer support by calling other courts in the area if help is needed.

Over the past four years we have tried to use a general-purpose court package that was designed out of state with limited success. There are currently no other known court packages designed specifically for the State of Wisconsin.
