

To the City Clerk and the Aldermen and Women,

As a small business owner, I understand the desire to open a business and the rewards associated with it. I encourage businessmen and women to open businesses in the area and contribute to West Allis' local business economy. However, I'm writing this letter out of concern about the Combination Class A liquor License possibly being granted to the new European grocery store on the intersection of 84th St. and Greenfield Ave. It was my understanding that the quota for these licenses in West Allis was maxed out, meaning no more businesses would be receiving them. We strongly object to this business receiving a liquor license when the quota has been reached, as this would be tantamount to a special privilege granted only some businesses, excluding others. I must also mention that this area is already saturated with liquor licenses, and more licenses granted would negatively affect the other businesses and more, the community. I appreciate your time and hope you will consider our opinion on this matter.
