SECTION 1:

Executive Summary

Description of District

Tax Incremental District ("TID") No. 18 ("District") is a proposed industrial district comprising approximately 7 acres including the existing Chr. Hansen facility located at 9015 W. Maple Street, and additional parcels owned by Chr. Hansen ("Developer") located to the east, west and northwest of the facility (See map in Section 3). The Developer is a global bioscience company that develops and produces cultures, enzymes, probiotics and natural colors for a variety of foods, confectionery, beverages, dietary supplements, animal feed and plant protection. The District will be created to pay the costs of incentives to support Developer's plan to expand its facilities in West Allis ("Project"). Specifically, Developer plans an expansion ("Phase I") consisting of construction of a 20,000 square foot building to provide a larger footprint for its Food Cultures & Enzymes facility. The Project will also include renovations to space for corporate operations. The addition represents an estimated \$9 - \$18 million capital investment in the facility that is expected to create 25 - 30 new jobs.

The Developer has indicated that the trajectory of the current business and future growth plans leave the company positioned to invest in further expansions within the District ("Phase II"). To allow for the possibility for future growth and expansion, Developer recently acquired several adjacent apartments and the Knights of Columbus Hall. While no specific additional investment in the site beyond the 20,000 square foot addition is currently proposed, the Project Plan ("Plan") for the District has been written to accommodate potential additional expansions.

Estimated Total Project Cost Expenditures

The City anticipates making total expenditures of approximately \$13.6 million ("Project Costs") to undertake the projects listed in this Plan. Project Costs include:

- An estimated \$1.4 million in Phase I "pay as you go" incentive payments for the 20,000 square foot expansion. To be eligible to receive the incentive payments, Developer must complete the Phase I improvements not later than December 31, 2022.
- A \$11.9 million placeholder for additional Phase II "pay as you go" incentive payments that would be paid if Developer further expands within the District. This figure is an estimate and could increase or decrease: actual incentive amounts available would be determined by the timing and amount of incremental value created. Payment of incentives for any Phase II investment would be available only for buildings or building additions where construction commences prior to July 1, 2025.
- \$200,000 for incentives or other Project Costs to support housing or other economic development in areas located within ½ mile of the District.
- \$155,000 for District administrative expense to include cost to create the District.

Incremental Valuation

The City projects that Developer's Phase I investment will create \$5,000,000 in incremental value. For purposes of illustration only, the City has assumed Phase II investment will create an additional \$35,000,000 in incremental value. Creation of this additional value will be made possible by the Project Costs made within the District. Assumptions as to the development timing and associated values is included in Section 10 of this Plan.

Expected Termination of District

Based on the Economic Feasibility Study located within this Plan, the City anticipates that the District will generate enough tax increment to pay all Project Costs within 17 years, reflecting 15 years of actual tax increment collection given the interval between the time improvements are constructed and the time when taxes are first received. The District would be permitted to remain open for up to twenty years if necessary.

Summary of Findings

As required by Wis. Stat. § 66.1105, and as documented in this Plan and the exhibits contained and referenced herein, the following findings are made:

- 1. That "but for" the creation of this District, the development projected to occur as detailed in this Plan: 1) would not occur; or 2) would not occur in the manner, at the values, or within the timeframe desired by the City. In reaching this determination, the City has considered the discussions and negotiations it has had with Developer and their representations as to the need for public investment in the Project in order to allow for it to proceed within the City. It is the City's judgement that but for provision of appropriate incentives, the Developer will likely elect to expand its operations in Denmark or elsewhere instead of within the City.
- 2. The economic benefits of the District, as measured by increased employment, business and personal income, and property value, are sufficient to compensate for the cost of the improvements. In making this determination, the City has considered that in addition to the creation of incremental value, the Project will result in short-term construction and long-term bio-science industry employment opportunities, and general improvement of the District area likely to enhance values of nearby property.
- 3. The benefits of the proposal outweigh the anticipated tax increments to be paid by the owners of property in the overlying taxing jurisdictions. As required by Wis. Stat. § 66.1105(4)(i)4., a calculation of the share of projected tax increments estimated to be paid by the owners of property in the overlying taxing jurisdictions has been prepared and can be found in Appendix A of this plan. However, because the Project would not occur without the use of tax incremental financing, these tax increments would not be paid but for creation of the District. Accordingly, the City finds that the benefits expected to be realized as set forth in this Plan outweigh the value of the tax increments to be invested in the Project.
- 4. Not less than 50% by area of the real property within the District is suitable for industrial sites as defined by Wis. Stat. § 66.1101 and has been zoned for industrial use. Any real property within the District that is found suitable for industrial sites and is zoned for industrial use at the time of creation of the District will remain zoned for industrial use for the life of the District.
- 5. Based on the foregoing finding, the District is designated as an industrial district.
- 6. The Project Costs relate directly to promoting industrial development in the District, consistent with the purpose for which the District is created.
- 7. Improvements to be made in the District are likely to significantly enhance the value of substantially all of the other real property in the District.

- 8. The equalized value of taxable property in the District, plus the incremental value of all existing tax incremental districts within the City does not exceed 12% of the total equalized value of taxable property within the City.
- 9. The City estimates that none of the territory within the District will be devoted to retail business at the end of the District's maximum expenditure period, pursuant to Wisconsin Statutes Section 66.1105(5)(b).
- 10. That there are no parcels to be included within the District that were annexed by the City within the three-year period preceding adoption of this Resolution.
- 11. The Plan for the District is feasible and is in conformity with the Master Plan of the City.

SECTION 2:

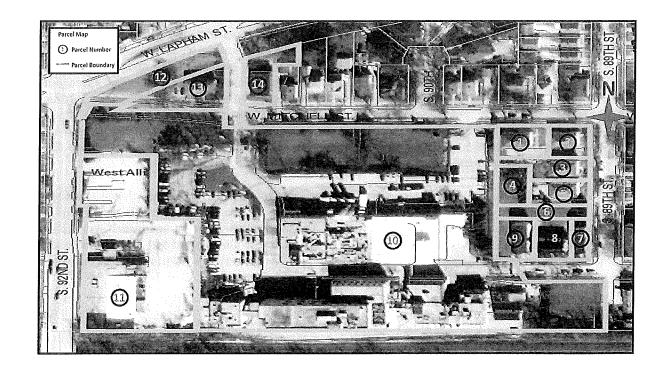

Type and General Description of District

The District is a proposed industrial district comprising approximately 7 acres including the existing Chr. Hansen facility located at 9015 W. Maple Street, and additional parcels owned by Chr. Hansen located to the east, west and northwest of the facility (See map in Section 3). The Developer is a global bioscience company that develops and produces cultures, enzymes, probiotics and natural colors for a variety of foods, confectionery, beverages, dietary supplements, animal feed and plant protection. The District will be created to pay the costs of incentives to support Developer's plan to expand its facilities in West Allis. Specifically, Developer plans an expansion consisting of construction of a 20,000 square foot building to provide a larger footprint for its Food Cultures & Enzymes facility. The Project will also include renovations to space for corporate operations. The addition represents an estimated \$9 - \$18 million capital investment in the facility that is expected to create 25 - 30 new jobs.

The Developer has indicated that the trajectory of the current business and future growth plans leave the company positioned to invest in further expansions within the District. To allow for the possibility for future growth and expansion, Developer recently acquired several adjacent apartments and the Knights of Columbus Hall. While no specific additional investment in the site beyond the 20,000 square foot addition is currently proposed, the Project Plan for the District has been written to accommodate potential additional expansions.

SECTION 5:

Preliminary Parcel List and Analysis

The table located on the following page identifies the parcels to be included in the District. The City finds that 7.09 acres, or 100% of the total area of the real property within the District is suitable for industrial sites as defined by Wis. Stat. § 66.1101 and has been zoned for industrial use.

 $^{^4\}mathrm{lnformation}$ obtained from City of West Allis GeoWeb Parcel Viewer on 8-27-2019.

²2019 assessed values provided by City (e-mail dated 8-22-2019). Base value will be calculated using 2020 assessed values. ³Assumes former tax-exempt Knights of Columbus site land will be assessed at same value per acre as current CHR. Hansen, Inc. parcel 451-1006-000.

⁴Improvements located on these parcels were demolished in January 2019 and will not be included within the District's base value.

⁸Ratio shown is for 1-1-2018, (1-1-2019 ratio unavailable as of 10-7-2019).

SECTION 6:

Equalized Value Test

The following calculations demonstrate that the City expects to be in compliance with Wis. Stat. § 66.1105(4)(gm)4.c., which requires that the equalized value of the taxable property in the proposed District, plus the value increment of all existing tax incremental districts, does not exceed 12% of the total equalized value of taxable property within the City.

SECTION 7:

Statement of Kind, Number and Location of Proposed Public Works and Other Projects

Project Costs are any expenditure made, estimated to be made, or monetary obligations incurred or estimated to be incurred as outlined in this Plan. Project Costs will be diminished by any income, special assessments or other revenues, including user fees or charges, other than tax increments, received or reasonably expected to be received in connection with the implementation of the Plan. If Project Costs incurred benefit territory outside the District, a proportionate share of the cost is not a Project Cost. Costs identified in this Plan are preliminary estimates made prior to design considerations and are subject to change after planning, design and construction is completed.

With all Project Costs, the costs of engineering, design, survey, inspection, materials, construction, restoring property to its original condition, apparatus necessary for public works, legal and other consultant fees, testing, environmental studies, permits, updating City ordinances and plans, judgments or claims for damages and other expenses are included as Project Costs.

The following is a list of public works and other tax incremental financing eligible Project Costs that the City expects to make, or may need to make, in conjunction with the implementation of the District's Plan. The map found in Section 8 of this Plan along with the Detailed List of Project Costs found in Section 9 provide additional information as to the kind, number and location of potential Project Costs.

Property, Right-of-Way and Easement Acquisition

Acquisition of Rights-of-Way

The City may need to acquire property to allow for installation of streets, driveways, sidewalks, utilities, stormwater management practices and other public infrastructure. Costs incurred by the City to identify, negotiate and acquire rights-of-way are eligible Project Costs.

Acquisition of Easements

The City may need to acquire temporary or permanent easements to allow for installation and maintenance of streets, driveways, sidewalks, utilities, stormwater management practices and other public infrastructure. Costs incurred by the City to identify, negotiate and acquire easement rights are eligible Project Costs.

Relocation Costs

If relocation expenses are incurred in conjunction with the acquisition of property, those expenses are eligible Project Costs. These costs may include but are not limited to: preparation of a relocation plan; allocations of staff time; legal fees; publication of notices; obtaining appraisals; and payment of relocation benefits as required by Wis. Stat. Chapter 32 and Wis. Admin. Code ADM 92.

Utilities

Sanitary Sewer System Improvements

To allow development to occur, the City may need to construct, alter, rebuild or expand sanitary sewer infrastructure within the District. Eligible Project Costs include, but are not limited to, construction, alteration, rebuilding or expansion of: collection mains; manholes and cleanouts; service laterals; force mains; interceptor sewers; pumping stations; lift stations; wastewater treatment facilities; and all related appurtenances. To the extent sanitary sewer projects undertaken within the District provide direct benefit

to land outside of the District, the City will make an allocation of costs based on such benefit. Those costs corresponding to the benefit allocated to land within the District, and necessitated by the implementation of the Project Plan, are eligible Project Costs. Implementation of the Project Plan may also require that the City construct, alter, rebuild or expand sanitary sewer infrastructure located outside of the District. That portion of the costs of sanitary sewer system projects undertaken outside the District which are necessitated by the implementation of the Project Plan are eligible Project Costs. The improvements to the wastewater treatment facilities, although not within the ½ mile radius, is an eligible project cost under Wis. Stat. § 66.1105(2)(f)1 k.

Water System Improvements

To allow development to occur, the City may need to construct, alter, rebuild or expand water system infrastructure within the District. Eligible Project Costs include, but are not limited to, construction, alteration, rebuilding or expansion of: distribution mains; manholes and valves; hydrants; service laterals; pumping stations; wells; water treatment facilities; storage tanks and reservoirs; and all related appurtenances. To the extent water system projects undertaken within the District provide direct benefit to land outside of the District, the City will make an allocation of costs based on such benefit. Those costs corresponding to the benefit allocated to land within the District, and necessitated by the implementation of the Project Plan, are eligible Project Costs. Implementation of the Project Plan may also require that the City construct, alter, rebuild or expand water system infrastructure located outside of the District. That portion of the costs of water system projects undertaken outside the District which are necessitated by the implementation of the Project Plan are eligible Project Costs.

Stormwater Management System Improvements

Development within the District will cause stormwater runoff. To manage this stormwater runoff, the City may need to construct, alter, rebuild or expand stormwater management infrastructure within the District. Eligible Project Costs include, but are not limited to, construction, alteration, rebuilding or expansion of: stormwater collection mains; inlets, manholes and valves; service laterals; ditches; culvert pipes; box culverts; bridges; stabilization of stream and river banks; and infiltration, filtration and detention Best Management Practices (BMP's). To the extent stormwater management system projects undertaken within the District provide direct benefit to land outside of the District, the City will make an allocation of costs based on such benefit. Those costs corresponding to the benefit allocated to land within the District, and necessitated by the implementation of the Project Plan, are eligible Project Costs. Implementation of the Project Plan may also require that the City construct, alter, rebuild or expand stormwater management infrastructure located outside of the District. That portion of the costs of stormwater management system projects undertaken outside the District which are necessitated by the implementation of the Project Plan are eligible Project Costs.

Electric Service

To create sites suitable for development, the City may incur costs to provide, relocate or upgrade electric services. Relocation may require abandonment and removal of existing poles or towers, installation of new poles or towers, or burying of overhead electric lines. Costs incurred by the City to undertake this work are eligible Project Costs.

Gas Service

To create sites suitable for development, the City may incur costs to provide, relocate or upgrade gas mains and services. Costs incurred by the City to undertake this work are eligible Project Costs.

Communications Infrastructure

To create sites suitable for development, the City may incur costs to provide, relocate or upgrade infrastructure required for voice and data communications, including, but not limited to: telephone lines, cable lines and fiber optic cable. Costs incurred by the City to undertake this work are eligible Project Costs.

Streets and Streetscape

Street Improvements

To allow development to occur, the City may need to construct or reconstruct streets, highways, alleys, access drives and parking areas. Eligible Project Costs include, but are not limited to: excavation; removal or placement of fill; construction of road base; asphalt or concrete paving or repaving; installation of curb and gutter; installation of sidewalks and bicycle lanes; installation of culverts, box culverts and bridges; rail crossings and signals; utility relocation, to include burying overhead utility lines; street lighting; installation of traffic control signage and traffic signals; pavement marking; right-of-way restoration; installation of retaining walls; and installation of fences, berms, and landscaping.

Streetscaping and Landscaping

To attract development and/or redevelopment consistent with the objectives of this Plan, the City may install amenities to enhance development sites, rights-of-way and other public spaces. These amenities include but are not limited to: landscaping; lighting of streets, sidewalks, parking areas and public areas; installation of planters, benches, clocks, tree rings, trash receptacles and similar items; and installation of brick or other decorative walks, terraces and street crossings. These and any other similar amenities installed by the City are eligible Project Costs.

Community Development

Cash Grants (Development Incentives)

The City may enter into agreements with property owners, lessees, or developers of land located within the District for sharing costs to encourage the desired kind of improvements and assure tax base is generated sufficient to recover Project Costs. No cash grants will be provided until the City executes a developer agreement with the recipient of the cash grant. Any payments of cash grants made by the City are eligible Project Costs.

Revolving Loan/Grant Program (Development Incentives)

To encourage private development consistent with the objectives of this Plan, the City, through its CDA may provide loans or grants to eligible property owners in the District. Eligible improvements will be those that are likely to improve the value of the property, enhance the visual appearance of the property and surrounding area, correct safety deficiencies, or as otherwise specified by the CDA in the program manual. Any funds returned to the CDA from the repayment of loans made are not considered revenues to the District and will not be used to offset District Project Costs. Instead, these funds may be placed into a revolving fund and will continue to be used for the program purposes stated above. Any funds provided to the CDA for purposes of implementing this program are considered eligible Project Costs.

Contribution to Community Development Authority (CDA).

As provided for in Wis. Stat. § 66.1105(2)(f)1.h and Wis. Stat. § 66.1333(13), the City may provide funds to its CDA to be used for administration, planning operations, and capital costs, including but not limited to real property acquisition, related to the purposes for which it was established in furtherance of any redevelopment or urban renewal project. Funds provided to the CDA for this purpose are eligible Project Costs.

Miscellaneous

Projects Outside the Tax Increment District

Pursuant to Wis. Stat. § 66.1105(2)(f)1.n, the City may undertake projects within territory located within one-half mile of the boundary of the District provided that: 1) the project area is located within the City's corporate boundaries; and 2) the projects are approved by the Joint Review Board. The cost of projects completed outside the District pursuant to this section are eligible project costs and may include any project cost that would otherwise be eligible if undertaken within the District. Implementation of the Plan may require the City to make the following project cost expenditures outside the District:

- 1. Payment of development incentives or other Project Costs to encourage redevelopment projects.
- 2. Payment of development incentives or other Project Costs for residential property rehabilitation.

Professional Service and Organizational Costs

The costs of professional services rendered, and other costs incurred, in relation to the creation, administration and termination of the District, and the undertaking of the projects contained within this Plan, are eligible Project Costs. Professional services include but are not limited to: architectural; environmental; planning; engineering; legal; audit; financial; and the costs of informing the public with respect to the creation of the District and the implementation of the Plan.

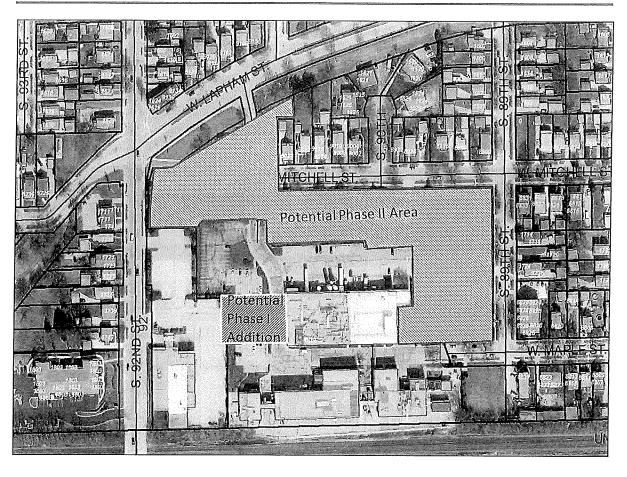

Administrative Costs

The City may charge to the District as eligible Project Costs reasonable allocations of administrative costs, including, but not limited to, employee salaries. Costs allocated will bear a direct connection to the time spent by City employees relating to the implementation of the Plan.

Financing Costs

Interest expense, debt issuance expenses, redemption premiums, and any other fees and costs incurred in conjunction with obtaining financing for projects undertaken under this Plan are eligible Project Costs.

SECTION 8: Map Showing Proposed Improvements and Uses

The proposed improvements identified on the map reflect the location of the Developer's proposed and potential future facility expansions. District Project Costs, consisting of development incentives may be made throughout the District, and in areas located within ½ mile of the District's boundaries.

SECTION 9:

Detailed List of Project Costs

The following list identifies the Project Costs that the City currently expects to incur in implementing the District's Plan. All projects identified, and related costs reflect the best estimates available as of the date of preparation of this Plan. All costs are preliminary estimates and may increase or decrease. Certain Project Costs listed may become unnecessary, and other Project Costs not currently identified may need to be made. (Section 7 details the general categories of eligible Project Costs). Changes in Project Cost totals or the types of Project Costs to be incurred will not require that this Plan be amended. This Plan is not meant to be a budget nor an appropriation of funds for specific Project Costs, but a framework within which to manage Project Costs.

	City of West Allis, Wisco Tax Increment District #18 (Chr. Hanser Estimated Project List		
Project ID	Project Name/Type	EstimatedTiming	Estimated Cost

	mated Project Costs		13,642,034

SECTION 10:

Economic Feasibility Study, Financing Methods, and the Time When Costs or Monetary Obligations Related are to be Incurred

This Section includes a forecast of the valuation increases expected within the District, the associated tax increment collections, a summary of how Project Costs would be financed, and a projected cash flow demonstrating that the District is economically feasible.

Key Assumptions

The analysis included in this Section assumes that the Project Costs the City plans to make will create \$40 million in incremental value by January 1, 2026. Phase I, projected to create \$5 million in incremental value, is expected to be completed by the end of 2021. For purposes of illustrating potential additional Phase II incentives, the analysis assumes that an additional \$25 million in incremental value will be created by the end of 2023, and an additional \$5 million by the end of both 2024 and 2025. These estimated valuations and timing are included in **Table 1**. Assuming the City's current equalized TID Interim tax rate of \$28.56 per thousand of equalized value, and no economic appreciation or depreciation, the Project would generate approximately \$19.3 million in incremental tax revenue over the 20-year term of the District as shown in **Table 2**.

Table 1 – Development Assumptions

¹Assumed valuation for Phase I taken from Chr. Hansen TIF assistance request letter received 11-21-2018.

²Development agreement provides for issuance of additional MROs for Phase II buildings or building additions where construction has commenced no later than July 1, 2025. Phase II estimated valuation is for purposes of illustration only. Phase II investment may not occur, or may be less or greater than assumed for modeling purposes.

Notes:

Table 2 - Tax Increment Projection Worksheet

¹Assumed tax rate is actual TID interim rate for 2018/19 per DOR Form PC-202.

Financing and Implementation

Expected District Project Costs consist of "pay as you go" development incentives in an estimated amount of \$1.4 million for the 20,000 square foot Phase I expansion. To be eligible to receive the incentive payments, Developer must complete the Phase I improvements not later than December 31, 2022. The Plan also includes an \$11.9 million placeholder for additional Phase II "pay as you go" incentive payment that would be paid if Developer further expands within the District. This figure is an estimate and could increase or decrease: actual incentive amounts available would be determined by the timing and amount of incremental value created. Payment of incentives for any Phase II investment would be available only for buildings or building additions where construction commences prior to July 1, 2025.

In addition to development incentives for Developer's project, the Plan includes an additional \$200,000 for incentives or other Project Costs to support housing or other economic development in areas located within ½ mile of the District, and \$155,000 for District administrative expense to include cost to create the District. All Project Costs will be paid from tax increment as it is received, and the City's obligation to make development incentive payments will be limited to tax increment generated by the Project and subject to annual appropriation. The City will advance funds as needed to pay District administrative expenses prior to the availability of tax increments.

Based on the valuations and costs assumed, the District is projected to accumulate enough funds by the year 2037 to pay off all Project related District liabilities and obligations. The projected early closure is based on the various assumptions noted in this Plan and will vary dependent on actual Project Costs incurred and the actual amount of tax increments collected. A projection of District cash flows is found on **Table 3**.

Table 3 - Cash Flow

²bevelopment agreement provides for issuance of additional MROs for Phase II buildings or building additions where construction has commenced no later than July 1, 2025. Phase II estimated MRO payments are provided for purposes of illustration only. Phase II investment may not occur, or may be less or greater than assumed for modeling purposes.

Assumes 2% investment earnings on positive fund balances, and no interest charged on advances from other funds to cover deficit fund balances.

Notes:

Projected TID Closure

SECTION 11:

Annexed Property

A tax incremental district cannot include annexed territory unless at least three years have elapsed since the annexation, or certain other requirements are met. None of the property within the proposed District boundary was annexed during the past three years.

SECTION 12:

Estimate of Property to be Devoted to Retail Business

Pursuant to Wis. Stat. § 66.1105(5)(b), the City estimates that none of the territory within the District will be devoted to retail business at the end of the District's maximum expenditure period.

SECTION 13:

Proposed Zoning Ordinance Changes

The proposed Plan is in general conformance with the City's current zoning ordinances. Land within the District is zoned industrial and will remain in a zoning classification suitable for industrial sites for the life of the District.

SECTION 14:

Proposed Changes in Master Plan, Map, Building Codes and City of West Allis Ordinances

The proposed Plan is in general conformance with the City's Comprehensive Plan identifying the area as appropriate for industrial development. Development within the District will be required to conform to State Building Codes and will be subject to the City's permitting and inspection procedures. The proposed Plan conforms to all relevant State and local ordinances, plans, and codes. No changes to the existing regulations are proposed or needed

SECTION 15:

Relocation

Should implementation of this Plan require relocation of individuals or business operations, relocations will be handled in compliance with Wis. Stat. Chapter 32 and Wis. Admin. Code ADM 92.

SECTION 16:

Orderly Development of the City of West Allis

Creation of the District and the implementation of the projects in its Plan will promote the orderly development of the City by facilitating the expansion of industrial sites through redevelopment of property and providing appropriate financial incentives for private development projects. Through use of tax increment financing, the City can attract new investment that results in increased tax base. Development will occur in an orderly fashion in accordance with approved plans so that the Projects will be compatible with adjacent land uses. The Project and its expansion of manufacturing facilities will result in short-term construction and long-term bio-science industry employment opportunities, and general improvement of the District area likely to enhance values of nearby property.

SECTION 17:

List of Estimated Non-Project Costs

Non-project costs are public works projects which only partly benefit the District. Costs incurred that do not benefit the District may not be paid with tax increments. Examples of non-project costs are:

- A public improvement made within the District that also benefits property outside the District.
 That portion of the total Project Costs allocable to properties outside of the District would be a
 non-project cost.
- A public improvement made outside the District that only partially benefits property within the District. That portion of the total Project Costs allocable to properties outside of the District would be a non-project cost.
- Projects undertaken within the District as part of the implementation of this Project Plan, the costs of which are paid fully or in part by impact fees, grants, special assessments, or revenues other than tax increments.

No improvements to be made within the District will benefit property outside the District. Furthermore, there will be no improvements made outside the District that will only partially benefit the District.

SECTION 18:

Opinion of Attorney for the City of West Allis Advising Whether the Plan is Complete and Complies with Wisconsin Statutes 66.1105
