**Subject:** Letters of Opposition to Michels - Michels Response  
**Attachments:** Criminal Investigations Partial Slide Show.pdf

Michels Corporation asked that I pass along their response to those who were initially submitted letters of opposition to the proposed batch plant project.

Please see the Michels Corporation response in the email below and the attached document that they submitted.

Thank You,

Shaun

Shaun -

We have reviewed some of the letters and information provide in the objection letters. Based upon the condition that we will not use TTW, we believe a majority of the concerns are addressed in regards to the descriptions of the objections. We will do our best to address the other concerns with each objector.

Specifically one of the objection letters included some slides from a presentation. That presentation was used in the training of criminal investigations and prosecution of bad actors and batch plant operations in violation of EPA and Texas laws. Using those slides as a representation of Michels potential and intended operations is a gross mischaracterization of our intended use.

We hope you share this information with the reviewing group so that the information presented by one of the objectors is not misrepresented to the council and the citizens of West Allis.

You can find the full presentation and information to the slide presentation at the link below.
