

City/Village Clerk,

Please share this memo with the Common Council/Village Board expressing the comments of the Wisconsin Underground Contractors Association to the Intergovernmental Cooperation Council (ICC) on October 8, 2012 held at the Brown Deer Village Hall.

Remarks of Richard W. Wanta, Executive Director, Wisconsin Underground Contractors Association located in Wauwatosa. We are a 75-year old contractor association representing water, sewer, tunnel, utility contractors and service-oriented firms.

Due to this severe construction economy these past four years, this is a perfect time to design, bid, and build water and sewer projects in your community for the following reasons:

- A. Area contractors are bidding at late 1990 unit prices with little or no profit to keep their people employed and to pay their fixed costs so that they can stay in business.
- B. Nowadays there are 15-20 bidders on area water & sewer projects saving the taxpayers tens of thousands of dollars. (Please see attached). In good construction years there would be 4 or 5 bidders on your projects. These are tax savings that could go to the purchase of a squad car, fire truck, police & fire wages, or to keep the local library open longer hours.
- C. It is not only area contractors that benefit from your public works projects in your community but many ancillary businesses to include pipe suppliers, aggregate companies, truckers, insurance and bonding. All those employers are providing employment for area residents.
- D. The cost of money with current low interest rates is low. If you wait, those construction costs will go up due to inflation, higher negotiated wages, and increased fuel & supply costs. The taxpayers will just end up paying more in later on today's needed project.
- E. Area contractors provide family-supported wages. Since area manufacturing is down with their jobs, the area construction industry can fill the vacuum and pay good wages, health & pension contributions to area residents.
- F. This proposal is not make work but much needed improvements to area infrastructure to protect the taxpayers "investment" in existing water & sewer mains. Recently the American Society of Civil Engineers rated our national infrastructure as a "D".
- G. The average age of the construction workforce in the Milwaukee area is 46-years of age. We cannot train your unemployed young residents and provide them a career in public works construction if we do not have projects to train them on. We cannot train a pipe layer or a machine operator with a textbook at the local MATC. They actually have to dig the trench, lay the pipe, repair that manhole, and perhaps install the fire hydrant through on-the-job training.

Why not take advantage of these low prices with multiple bids, help us to employ your residents, train young people, and make infrastructure improvements to protect your community investment? The taxpayers of yesterday would expect no less.

Thank you for the opportunity to comment.

We dig Wisconsin

■ Cudahy/Sanitary & Storm Sewer Improvements

Wednesday, October 3 2012

Project: Miscellaneous Sanitary & Storm Sewer Improvements, Cudahy, Milwaukee County,
#Project No. 2012-06
