Steve Schaer Department of Development West Allis City Hall 7525 West Greenfield Avenue West Allis, WI 53214

Dear Mr. Schaer:

I would like to endorse the draft City of West Allis Bicycle and Pedestrian Master Plan and recommend its adoption.

Over the past decade there has been a growing relationship between urban planning and public health in promoting the concept of a built environment that supports healthy behaviors. The built environment can influence the health in a community largely because of the transportation choices made by urban planners.

This drafted plan makes transportation choices that promote bicycling and creates a "walkable community" in West Allis. Literature and research indicates that when these design features are incorporated into community planning, households do walk and bicycle more and drive less. A growing body of research is also showing that communities with these designs are associated with higher physical fitness levels, lower levels of obesity, and exposure to fewer harmful air pollutants. I believe the drafted plan will contribute to a community design that will promote positive health behaviors in West Allis.

I support the adoption of this plan and recommend incorporating it into future comprehensive plans for West Allis.

Sincerely,

Terry Brandenburg Health Commissioner

TB/gs
