Double Pivot Hook Hoist Series

Galbreath double pivot hook hoists are designed for higher hauling capacities than single pivot hook models. They allow the container to be locked during the dump cycle. Maximum hook height of 61-3/4".

Features **Options** **Models** **Applications** **Literature** **Tarps & Parts**

- Offers superior maneuverability, versatility and value
- Tolerates imperfect alignment
- Up to a 62° dump angle for clean discharge
- Power loading and unloading for ultimate control
- Provides exceptionally fast cycle times
- Superior in-cab operation
- Bumper and recessed lights are standard
- Hoists are designed to be operator-friendly with pup trailer use
- Steel hydraulic tank is standard on all units
- Inside air controls standard where applicable
