RE: Additional Server Request to Increase City's Server Capacity
Date: June 2, 2016

I am requesting authorization to purchase an additional server from GHA Technologies, Inc. for a sum of \$21,786.81. This additional server will increase our server storage capacity for the city which is needed to maintain all of the city's data. This purchase is an upgrade to our existing Scale hyper-convergence server cluster which consists of proprietary hardware and can only be purchased through their authorized reseller.

I am also requesting a transfer of \$21,786.81 from the Reserve-Designated for Capital Accumulation Account (100-0000-345-70-03) to the Information Technologies Hardware Account (100-1101-517-70-08) to fund this purchase. This reserve account was designated for a replacement of our old AS400 which is no longer necessary.

If you have any questions, please feel free to contact me.

Sincerely,

A handwritten signature in blue ink that reads "Jim Jandovitz".

Jim Jandovitz,
Director of Information Technology
