CITY OF WEST ALLIS
CLERK/TREASURER

Dear common council,

We are writing this letter to express concerns with Zignego Concrete (551 S Curtis Rd Milwaukee, WI 53214), and declare our opposition to the proposed permit for Zignego to relocate fuel tanks on their property. The following is a list of grievances we have with Zignego Concrete. We hope it will illustrate why we oppose the permit and cause the common council to act to improve the quality of life in the surrounding neighborhood.

Our primary concern is that Zignego's plan would move fuel tanks dangerously close to Rainbow Park, Walker Elementary School, and a neighborhood of families young and young at heart.

It has been reported to us by city and county workers that Zignego routinely ignores ordinances in place to limit rubble below the fence line of their lot. This creates an eyesore for the community, but more importantly it shows a disturbing lack of respect for rules meant to protect and preserve our community.

Zignego routinely ignores noise ordinances by running machinery at all times of day and night. While we are told special rules were created that allow them to carry on production during "high demand" projects, they do nothing to notify the community of the duration of their projects. It is not uncommon as a neighbor to the plant to wake up after one AM to loud bangs, beeping, cascading rubble and machinery. This inconvenience occurs throughout the year, including winter. Also, at times of low wind, exhaust and airborne waste make it difficult to be outside. During these times, when the weather is otherwise beautiful, the park is unusable and empty.

In conclusion, the lack of action and concern taken by Zignego to address these pre-existing issues has us worried. Moving the tanks would certainly mean more noise, more chemical air pollution, and a cramped, less safe environment. It would enable a reckless company like Zignego to cause great damage to the community, especially in the event of an industrial accident. Action needs to be taken to stop the tanks from being moved and more needs to be done to address ordinance violations with Zignego Concrete.
