**Leak Detection Survey Description
100% of the system**

1. Beginning in 2026, all accessible hydrants and/or valves will be monitored as needed, with sensitive listening transducers/amplifier equipment to determine if leakage is occurring.
 2. All areas where leakage is confirmed will be further investigated with the computerized correlator to pinpoint the location of the leak.
 3. A report will be submitted containing detailed drawings of all leaks located, the estimated leak sizes, and the savings resulting from the repair of the leaks.
-
4. Westrum Leak Detection will provide all equipment and personnel to accomplish the above.
 5. The customer shall provide all personnel for traffic control, if needed, to successfully and safely complete the survey

1 Year agreement (2026) ————— \$18,900
