## **Electrical System Circuitry Types**

Series = high voltage 4,800 volts One conductor

Parallel = low voltage 120 or 240 volts 277 or 480 volts 2 or more conductors

## **Street Light Lamp Types**

**High Pressure Sodium**This light is more white in color
Used mostly on main streets

## **Low Pressure Sodium**

This light is more yellow/orange in color Used mostly in residential
