Subject: Behavioral health hospital

Good morning. I'm a nurse practitioner residing near 68 and Lincoln. I do not think that the proposed west allis location for the mental hospital is appropriate for several reasons.

Many of the mental health patients have other physical comorbidities. I see the need for this hospital to be adjacent to or very near a hospital to address emergent needs. I have experienced the need for patients at the current count facility to be emergently transferred to the ER.

Also, I do not agree with a mental health ER being associated with the proposed hospital. The amount of sirens with the near by fire department is already excessive , horns honking , traffics lights being delayed as the emergency vehicles make their way. This would only be greatly interested. We already bear the effects of the mental health facility on 67 and Beloit with many emergency calls to that facility.
