Wisconsin Library Ecosystem

Monday, August 23

Presenter: Jennifer Thiele (/jennifer-thiele) and John Thompson (/john-thompson) and Shannon Schultz (/shannon-schultz)

What is a library ecosystem and why is it important? In general terms, an ecosystem is a complex network or interconnected system. In today's webinar, we'll learn about the different partners involved in this ecosystem, beginning with a statewide perspective on how Wisconsin's public libraries work. We will move our way through the public library system and the importance of system membership, then finish with libraries at the local level. Along the way, we'll explore the statutory language that comes into play at each level, and we'll provide links to resources that can be helpful.

Thursday, August 26

Presenter: Patty Collins; Gail Santy; Maribeth Shafer (/patty-collins-gail-santy-maribeth-shafer)

Public libraries face ethical issues all the time. This session aims to create an open discussion about library core values and ethics. Inspired by a session at the 2020 Public Library Association Conference, our program provides real library ethical scenarios, followed by a discussion with a panel of experienced trainers. We will discuss sticky situations when personal ethics and professional ethics differ. This is a highly interactive session; audience participation is encouraged. Attendees will leave with a list of helpful resources and books.

Wisconsin Trustee Training Week (TTW) was developed in 2014 by Jamie Matczak at the Nicolet Federated Library System with the goal of providing high-quality webinars to public library boards, friends, and trustees in Wisconsin. Since 2015, TTW has been coordinated by Jean Anderson at the South Central Library System.
